

CMI PRODUCT DATA

PLASTIC EXHAUST STEM VENTS

CMI plastic roof vents are made of professional grade Polyethylene (PE). Polyethylene is used in everything from grocery bags, shampoo bottles, roofing vents and even bullet proof vests. The plastic in CMI roof vents is enhanced with UV stabilizers to protect against fading and sunlight deterioration. CMI plastic vents have their color mixed into the material to prevent fading and eliminate chipping or flaking.

For exhaust pipes terminating through the roof

- Manufactured with UV resistant polyethylene
- Reliability in all climate conditions
- Outlasts most roofing materials
- Outlasts most metal vents
- Back draft damper installed
- Available in 5 popular colors:
